- Google Analytics

Backend & CMS:

- Node.js
- REST APIs
- Firebase
- Strapi
- WordPress

Tools:

- Git/GitHub
- Figma
- Vite
- Vercel

## Experience

### Full-Stack Developer (Contract) - Sollas

10/2023 - Present · Remote

Project-based work for a design agency, covering the full stack across client web apps and marketing sites.

- Built and shipped web apps and marketing sites end to end with Next.js, React and Astro, paired with Strapi CMS, PostgreSQL and Firebase.
- Integrated Stripe (Checkout and Connect) for user payments and payouts, including webhook handling for payment events.
- Set up Firebase hosting, database and analytics, and built a real-time chat feature.
- Took full ownership of several client sites from design hand-off to deployment, including front-ends for client apps such as AlphaStack (Next.js).
- Maintained and evolved ppc.io for around 1.5 years as the main long-running project.
- Contributed pages to established WordPress sites, including The HOTH and Authority Builders.
- Currently building a crypto and finance dashboard with Next.js (under NDA).

### Front-End Developer - Metamorfosi Agency (client: Bold, UK)

06/2024 - 05/2026 · Remote

- Delivered 25+ responsive marketing and landing-page sites as part of an agency team.
- Built pixel-perfect interfaces from Figma using HTML, PostCSS and JavaScript, integrated with the client's WordPress / PHP back-end.
- Maintained consistent quality and fast turnaround across a high volume of projects.

### Freelance Front-End Developer

03/2023 - 10/2023 · Remote

- Developed complete front-ends for client websites, including submission forms.
- Optimized loading speed and SEO settings, which improved client conversions.
- Developed and hosted a website on WordPress.

## Selected Projects

PPC.io - Astro, Strapi CMS

- Built the complete multi-page marketing site single-handedly, then migrated content from Strapi CMS to Astro content collections, which removed the external dependency and improved build performance.

Backlinks Tool - Next.js, Strapi CMS

- Designed and built the site solo, front-end to CMS.

Money Track (money.italik.dev)

- React, TypeScript, Cloudflare Workers, Durable Objects, D1, Hono, Anthropic API  
AI-powered finance tracker built AI-augmented, with a deterministic-first core so the AI never invents figures. Bank sync via Monobank webhooks, per-user data isolation via Durable Objects, an LLM advisor grounded in one canonical SQL layer, live public demo.

Answerly - React, Node.js, Firebase, Stripe

- Built the full stack of an early-stage startup: real-time user-to-user chat, registration and authentication, and Stripe payments.

## Education

Oleksandr Dovzhenko Hlukhiv National Pedagogical University, 2021 - present Master's in History Education (in progress)
